Outline

[ABOUT ME](#)[GAMES](#)[ANIMATION](#)[GRAPHIC](#)[BLOGS](#)

This project is a portfolio piece to display my personal past and current work. It is necessary for a designer to have a personal portfolio, and considering that I am in the final year of my degree and lack any online presence, I am using this assignment to create a presence for myself. A portfolio and a form of online CV. I have categorised the projects that will be included on the website into Game Design, Modelling and Animation, Graphic Design and Blogs.

Game Design

The work displayed on the Game Design tab includes both completed work and concepts. So far in the completed works there are 3 full games (Breathe - MDDN343 Advanced Computer Game Design Project, Noble Steed and Rabble - 2014 PxlJam entry, and Warhaus - 2015 PxlJam entry) and 3 concepts that have been visualised to the extent of a shell of a game (Clash - Personal project, Test Subject 01 - Personal project and Pitch - MDDN243 concept project).

Modelling and Animation

This tab shows individual concept models and basic animations. These are individual projects that are not associated with any of the games above. Their intention is to display my personal skills in modelling and animation.

Graphic Design

My graphic design work is limited but still important enough to display on the website. This work is contract work for the Victoria University German Association. They hired me on three separate occasions to design tickets and posters for different events.

Index

All pages link together through the toolbar at the top of the webpage. From the home page there is a set of quick links at the bottom so the users can go directly to a project page without having to go through the tabs.

Style and number of tabs

Lighter shade of green makes it difficult to see the white text. Blue is not overly interesting colour combination. Green text on the home page is not very attractive for viewers. Blue text blends in too much and is difficult to read.

Warm colours, appears inviting, easy to read the white text on the background. The change in colour dictates the importance of each tab. Lighter colours draw attention over darker shades.

A mix of colour does not work. It looks terrible. There is too much going on in this. Enough said.

About Me

Information about myself and skills

HOME GAMES ANIMATION GRAPHIC BLOGS

MARK LINDSAY

I am a fourth year Victoria University student studying a Bachelor of Design Innovation, majoring in Media Design. My long-term career goal is to become a Game Design Modeler and Animator.

My strengths are in good team-work skills, dedication to learn any necessary skills that are needed for a job and my determination to achieve highly in my work.

SKILLS AND KNOWLEDGE

Expert knowledge in Adobe Photoshop and Autodesk Maya. Intermediate skills in Autodesk Mudbox, Zbrush, HTML and CSS. Beginner knowledge in Illustrator and Adobe Premiere Pro and After Effects. All of these skills can be developed further still.

2007-2011 | [Palmerston North Boys High, Palmerston North](#)

Game Design

Finished and conceptualised Games

HOME ABOUT ME ANIMATION GRAPHIC BLOGS

Noble Steed & Rabble is inspired by 2014 PxlJam theme "with your powers combined". The game pits two teams of knight and horse against one another utilising a single keyboard.

NOBLE, STEED & RABBLE

Breathe was created for a 300 level university paper "3D game design". We worked in teams of 6 (3 designers, 3 computer science student) to create a timed action game based on the original concept from Ash Jean-King.

BREATHE

Clash is a four player turn based strategy game. The aim is to destroy the other players encampments so your kingdom can claim the ancient ruins. Each setup phase, the player can choose which lane to send their units. You must choose who to attack tactically.

CLASH

No Image Available

TEST SUBJECT 01

Warhaus' initial concept was inspired by the 2015 PxlJam theme "One Rule". The design style was inspired by the bauhaus movement. 4 German tanks battle one another to become the perfect example of bauhaus design - by diminishing their parts until they only have 1 remaining. Each part had a different rule.
